How to manage a Programme successfully

[Programme Management](#) is a comparatively new technique, which can be defined as: the coordinated management of a portfolio of projects in order to achieve a set of business objectives (OGC). In a Programme Management Organisation, the projects are usually aimed at bringing about internal changes for the benefit of the business as a whole.

The authors will provide you with the key elements that are required for understanding and managing programmes effectively. An integrated framework to support Programme Management will be presented, leading to a better understanding of what is required in practice in order to "get things done". Among other things, the course is based on the Programme Management method known as "Managing Successful Programmes (MSP)", from OGC (OGC also developed ITIL and PRINCE®). The course offers you ideas, concepts, tools and remedies, all leading to better programme implementation.

Register today!

Do not miss this unique opportunity to check out all the key factors associated with directing and controlling successful programmes, and register today!

Target group

- Senior managers who are considering implementing a [Programme Management](#) approach
- Newly appointed Programme Managers who may have a background in managing projects, but not in a multi-project environment
- Business change managers, who require an understanding of the interface between benefit management and Programme Management
- Project managers who are managing projects as part of a larger programme
- Functional department managers whose staff may be seconded to programme work
- Functional staff and project team members who would benefit from a better understanding of the programme environment

PRINCE2 is a Trade Mark of the Office of Government Commerce.

PRINCE® is a Registered Trade Mark and a Registered Community Trade Mark of the Office of Government Commerce, and is registered in the U.S. Patent and Trademark Office.
