AIRCRAFT ECONOMIC LIFE 2015

"The conference was very valuable. Having left the aviation scene some time ago, the conference was the ideal re-entry point, not only because in a matter of two days I was fully up to speed again with all the relevant topics, but also because it provided me with the perfect opportunity to network with a very impressive array of key players. Furthermore, what I really appreciated is the fact that the Everest Events team had a very direct, personable approach to the conference, and that the conference was not another mass event. In summary: high octane, to the www.nyeventslist.com

point, with a human touch."

The presentations by experienced industry professionals delivered clear and interesting messages. Overall, I consider this an excellent conference, and well worth attending.

AIRCRAFT ECONOMIC LIFE SUMMIT 2014

I attended the Everest Events 'Aircraft Economic Life Summit' in Frankfurt in June, which addressed one of the most important issues currently facing the aviation leasing community. The conference was well structured and focussed, the chosen topics were very relevant and I was impressed by the quality of the speakers and the information they delivered. It is a long time since I have sat through every single presentation in a conference, but I stayed the entire distance for this one.

Jon Sharp

Congratulations, you put together a very good summit – one of the most beneficial I have attended.

RECORDS MANAGEMENT 2014

"Loved this seminar. It was very informative and there was a lot of participation from the attendees which made it even more interesting. It addressed changes happening in the industry now as well as the future. All of the presenters did a very good job at answering the dozens of questions asked. Wish it were 2 days instead of one because the amount of questions wanting to be asked we ran out of tie. Great job to the people at Everest for putting this together and the presenters."

Dawn Rice

The Record Management seminar covered many interesting topics, providing a very good insight on how lessors manage the Technical records task. Highly recommended.
