Description

Electronic Real-Time Benefit Check Authorization Forum

(RTBC) Real-Time Benefit Check provides the most accurate and complete information for patients and providers. Providers are better informed about patient medication choices and this can help patients better manage medication costs and adherence. Prior Authorization is a process that is used by healthcare insurance companies that help ensure the safe and appropriate use of selected prescription drugs and medical procedures. (ePA) Electronic prior authorization allows the provider to electronic request PA, returning it to the payer to receive a real time response.

ExL Events' Electronic Real-Time Benefit Check Authorization Forum will explore the implementation of electronic patient services for RTBV, eBV, ePA, EMRs and EHRs. Come learn and discuss on key principles for RTBC and review eBV standards and procedures that are used today in the industry. Don't miss out on networking and learning for all key stockholders!

Top Five Reasons to Attend

1. Hear case studies and panel discussion on electronic patient services for eBV, ePA, RTBV, EMRs and EHRs
2. Best practices on how to ensure information to the patients faster
3. Understand the importance of accurate real life eFB information for the patient, prescriber, and pharmacy
4. Review on how important it is to have accurate data and this is a key component for clinical success
5. Discuss electronic patient technology services will all stakeholders including health systems, manufactures, health plans and more
