# Learning Management Systems (LMS) (ntz) A

**Date :** Apr 19, 2018 - 09:00 AM - Apr 20, 06:00 PM

**Event URL :** http://www.nyeventslist.com/events/learning-management-systems-lms-ntz-a-apr-2018

**Organizer :** NetZealous LLC

**Venue :** To Be Announced

**Location :** 1, Main St
Washington, DC, USA, ZIP: 00000

## Learning Management Systems (LMS)

This course will describe the development of job position curricula in the pharmaceutical industry using a Learning Management System (LMS) and provide you with the tools needed to create effective curricula.

A Pharma curriculum is the sum total of all the courses that an employee in a specific position requires, and is composed of smaller groups of courses called modules. A curriculum typically will include a "core curriculum" (usually several modules) with all the required courses for all employees involved in GMP functions, a "job-specific" group of courses for the position, modules reflecting further subdivision of responsibilities within individual positions, roles in validated computer systems such as investigations, and roles in applicable hard-copy review processes.

Curricula, like SOPs, are controlled documents requiring review and signature. Your company's SOPs will typically require periodic, documented review of curricula. Curricula frequently change as SOPs are being created or revised, and a curriculum owner may require specific training prior to being authorized to approve a curriculum.

The individual designated as owner of a given curriculum should be someone who knows enough about specific roles in their organization. Curricula for GMP-regulated tasks that the user performs directly require the inclusion of assessments (knowledge or skill).

**Why you should attend:**

Learning Management Systems (LMSs) are important tools for assuring and demonstrating that Pharma employees maintain their training, and their GMP compliance, up to date. They often boast great functionality but also have limitations that must be overcome for a Pharma company to use them effectively. An area that is not understood well is the development of training curricula in these systems, which presents its own unique challenges and takes far more time to implement than is commonly thought. In addition, many employees have these responsibilities in addition to others not necessarily related to training and do not have the luxury of time to create and maintain a complex array of curricula.

---

**Areas Covered in the Session:**

- What a true Pharma curriculum is
- Requirements for Pharma curricula
- What a true Pharma curriculum is not
- Why is setting up curricula so complicated?
- Obtain details of employee job functions that are necessary for setting up curricula
- Demos and hands-on activities for employees
- Knowledge assessment and review

---

**Who will benefit:**

## This course will be of benefit to training employees, both individual contributors and management, who are responsible for the creation and management of Pharma training curricula such as:

- LMS administrators
- Trainers
- Training managers and their supervisors
- Subject matter experts
- Regulatory management
- QA management
- Consultants
- Quality Managers
- Audit Managers
- Quality Analysts

**AGENDA**

**Day 1 Schedule**

---

Lecture 1 (90 Mins): **Introduction to Pharma curricula - basic premise, regulatory requirements, knowledge check**

---

Lecture 2 (90 Mins): **Components of Pharma curricula - core curricula, job-specific curricula, modules, knowledge check**

---

Lecture 3 (90 Mins): **Relation between job descriptions and Pharma curricula, complications in curriculum structuring(job related, LMS-related)**

---

Lecture 4 (90 Mins): **Hands-on activities for basic curriculum and module setup outside of the LMS (conceptual)**

**Day 2 Schedule**

---

Lecture 1 (90 Mins): **Learning Management Systems (LMSs) and their relation to curricula**

---

Lecture 2 (90 Mins): **LMS functionality (employee information, training course entry, training completion entry) with demos and hands-on activities**

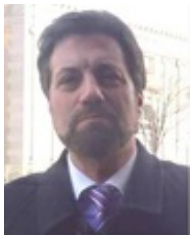
---

Lecture 3 (90 Mins): **Processes for curriculum revisions: regulatory requirements, LMS-related complications and how to manage these**

---

Lecture 4 (90 Mins): **Course review and knowledge assessment**

**SPEAKER**



**Michael Esposito**

Principal, TrainReach Consulting, LLC & Life Science Training Institute

**Michael Esposito** has over 30 years experience in the pharmaceutical industry and 17 years experience in GMP training and document management. He has worked for Wyeth Pharmaceuticals, Pfizer and Johnson & Johnson's McNeil Consumer Healthcare Division in a

variety of areas including Packaging, project administration, Quality Assurance, Government Contracts, translations, systems training, and international operations. He collaborated in the development and implementation of the training portion of the Consent Decree workplan for McNeil and revised their introductory GMP course. He is a member of the training organizations GMP Training Educators Association and Association for GXP Excellence and is fully fluent in Spanish. His areas of interest include systems training, training effectiveness, post-training user support, process improvement, and sustainable packaging.

Please contact the event manager Marilyn (marilyn.b.turner(at)nyeventslist.com ) below for:
- Multiple participant discounts
- Price quotations or visa invitation letters
- Payment by alternate channels (PayPal, check, Western Union, wire transfers etc)
- Event sponsorship

NO REFUNDS ALLOWED ON REGISTRATIONS
Prices may go up any time. Service fees included in pricing.
