---

### Overview

Government Technology's passion is helping spread best practices and spurring innovation in the public sector. The New York Digital Government Summit is designed to do just that. The summit has an advisory board that gathers public sector and private sector leaders to create an agenda designed to make that passion relevant and actionable to the state and local government organizations attending the summit. Participants tell us they use inspirational keynotes, leadership discussions, networking breaks, and timely topics discussed in the numerous breakout sessions to help advance the goals of their organizations and their own career paths.

Topics Include:

- Innovation and Leadership
- Digital Government Trends
- Emerging Technologies
- Cyber Security
- Data and Analytics
- Mobility and Citizen Engagement
- Cloud Services
- Collaboration

We are pleased to partner with Government Technology on the 2018 New York State Digital Government Summit. Technology touches every single aspect of New York State government, and by deploying innovative technology and solutions we will

continue to propel our government forward and better serve all New Yorkers. This year's Summit provides opportunities rich in professional development, networking, and the exchange of knowledge and ideas, and offers the opportunity to learn about cutting-edge technology. I encourage IT professionals from across all levels of government to attend this worthy event. I look forward to seeing you there!
