New York, NY, USA, ZIP: 10001

SWIFT Business Forum New York 2018

The transformation of financial services is underway and a new ecosystem is emerging with disruption giving way to collaboration. Incumbent players and fintechs are engaging in long-term partnerships to create innovative digital services in order to reimagine the customer experience and to achieve greater agility. With the pace of change set to accelerate, firms that seize the opportunity to evolve their business models and product offerings will win in a digital-first world.

Join us 12 September in New York to explore how fast, and how far, the transformation of the financial services will take place in the US and beyond. Discussion topics include the scale and speed of innovation in both payments and securities, harnessing the power of data and new technology, the rise of artificial intelligence and robotics, managing cyber resilience and financial crime compliance, and the transformative power of collaboration. The latest innovations and proof-of-concepts from SWIFT will also be showcased during SWIFTLab sessions.

The SWIFT Business Forum New York 2018 brings together 600+ industry leaders and influential decision makers from the payments, securities, market infrastructures, corporates and fintech communities. It provides extensive opportunities to network and engage with your peers in one of the most innovative, thriving and dynamic financial centers in North America.
