Event URL : <http://www.nyeeventslist.com/events/the-great-plains-laboratory-presents-gpl-university-practitioner-workshops>

Organizer : The Great Plains Laboratory, Inc.

Venue :

Location : 800 N. Central Ave.,
Glendale, CA, USA, ZIP: 91203
Phone: 913 341 8949

Ticket Price: One Day By January 28: USD 199.00, Both Days By January 28: USD 298.00, CME Per Day: USD 50.00

The Great Plains Laboratory, Inc. is pleased to bring you GPL Academy, a series of workshops designed to help practitioners learn how to integrate our comprehensive testing into their practices. When you attend a GPL Academy workshop, you will find out why our tests may be incredibly valuable to your practice, what particular markers may be the most meaningful to specific patients, and you will learn how to use our tests in tandem to provide your patients with the most personalized treatment plans possible.

Day 1: Organic Acids Testing Workshop

Learn how to use this comprehensive metabolic test in your practice, to help with your most difficult-to-diagnose patients. Find out how the OAT helps you discover the underlying causes of many chronic conditions and hear what kinds of treatments have been effective.

Qualified attendees receive one FREE Organic Acids Test, a \$299 value!

CME available!

Day 2: Environmental Toxin Testing Workshop

This workshop will focus on the epidemic of environmental toxin exposure, from the many

chemicals we encounter every day to mycotoxins released from mold. You will learn about many common environmental pollutants from the 172 chemicals tested by our GPL-TOX Profile. You will find out how these chemicals can affect our health and what steps can be taken to help detoxify the body. You will also learn about the seven types of mold mycotoxins tested for in our new GPL-Mycotox Profile and about the chronic health conditions mycotoxin exposure can cause. We will review how to use these tests in your practice to create the most effective treatments possible for your patients.
