2nd International Conference on Green and Renewable Energy is a platform that gathers global speakers and delegates to share their research and further provide them various profile upgradation programs.

After successful commencement of Green Energy 2019 in Italy and having listed in one of the finest chemical engineering conferences in Europe and the USA, the committee is highly optimistic for an overwhelming response from all the potential and interested persona of the relevant subject in Green Energy 2020. Scheduled for the commencement during September 14-16,2020 in Vancouver, Canada the venue itself speaks a lot about its legacy of conducting green energy and renewable energy events over the years and the prospect it is having for attracting new age researchers to witness the current advancements in chemical engineering.

Event Categories : ENVIRONMENT CONFERENCES, ENERGY AND INDUSTRY CONFERENCES, Life Sciences, Biotechnology,
